

HIGH RANGE CO₂/CO MONITOR

Bacharach MGC 200

Basic Features

- ◆ 0 to 10,000 ppm CO₂ & 0 to 500 ppm CO
- ◆ Includes Flow Regulator & Charger
- ◆ Convenient Zero Function
- ◆ Built-In Data Logging – 200 sets of readings
- ◆ Infrared CO₂ Sensor
- ◆ Electrochemical CO Sensor
- ◆ Dimensions: 5.5"H x 2.5"W x 0.8"D
- ◆ Weight: 12 oz
- ◆ Up to Nine Hours Operation on One Charge
- ◆ Two Hour Quick Charge Capability
- ◆ Internal Sampling Pump

Ordering Information

- ◆ 19-8059 MGC 200 CO₂ /CO Monitor
- ◆ 19-3254 Host Software with IrDA Link
- ◆ 19-3337 Small Carrying Case
- ◆ 19-3302 12V Car Charger

The MGC 200 is ideal for verifying Carbon Dioxide and Carbon Monoxide levels from medical gas outlets in hospitals. Bacharach's MGC 200 is a handheld monitor for verifying CO₂ and CO levels from medical gas outlets in hospitals. It can also be used for indoor air quality applications to verify CO₂/CO levels. The MGC 200 has a measuring range of 0 to 10,000 ppm CO₂ and 0 to 500 ppm CO, and with its built-in sampling pump, readings can be obtained in 60 seconds or less. The instrument meets the requirements of NFPA99, and is currently the smallest monitor available to check CO₂/CO outlets. The MGC 200 is remarkably easy to operate, and features built-in data logging for storing readings in memory, which can later be downloaded to a personal computer via its integral IrDA communications link and the optional BACH-COM Plus software.
